Anton Sergeenkov

Senior Frontend Developer | React | Vue.js | Svelte

Linkedin | Telegram | GitHub | Website | anthony.sergeenkov@gmail.com | Tbilisi, Georgia

Summary

- Software Engineer with 7 years of experience in Frontend Development (**React** - 6 years, **Next.js** - 2 years, **Vue.js** - 2 years, **TypeScript** - 4 years, **Svelte** - 1/2 year) and designing high-load scalable applications for the Web
- **Technical expertise**: application architecture design, business logic and UI development, using AI assistants in development (Claude Code, Cursor, Codex, Cline, Copilot), Unit and E2E testing coverage (Jest, Enzyme, Cypress), CI/CD, Code Review, Gitflow Workflow, experience in Backend development (Node.js)
- Experience in product companies, outsourcing and startup projects. Main industries of work: Enterprise, FinTech, Sports, Healthcare, Education
- Agile / Scrum / Kanban work in distributed teams, task analysis, participation in product development, ability to establish communication with people at different levels in the company
- Management experience, optimization of processes in the team, development of regulations and writing documentation
- Experience in interviewing, mentoring in IT companies and teaching in programming schools
- **Languages**: English: B1+, Russian: Native
- **Education**: Penza State University (Russia). Faculty of Computer Engineering

Work Experience

Frontend Developer (React, Vue, Svelte), ComboTech

- November 2025 – Now

> **Project**: Developing a platform with a common core and its own framework for running multiple products on a single platform containing a client application and BackOffice for administration
>
> **Improvements made**:
> - Participated in the development and successful release of several new platforms based on his own framework
> - Actively developed and proposed new interface solutions for the product using a multi-framework stack: React, Vue, Svelte
> - Optimized the application for BackOffice
> - Automated work on the project using AI assistants: Claude Code, Codex, Cursor
>
> **Stack**: React, Vue.js, Svelte, TypeScript, Claude Code, Cursor, Codex, Jest, Cypress, Git, HTML, CSS

React Frontend Developer, Bisengine

- March 2024 – June 2025

> **Projects**:
> - Design and development of a visual editor for AI assistants
> - Development of the "Moby Traffic" application using AI services to create a profile of a company's potential client
> - Development of the "Tamashi GDAI" application for generating Game Dev documentation based on AI services
>
> **Improvements made**:
> - Developed a methodology for creating Frontend applications using AI programming tools
> - Implemented a visual editor for designing and displaying flowcharts containing a sequence of commands for LLM

- Conducted research and developed an application for superficial comparison of flowchart images based on label cloud analysis
- Designed and implemented the architecture of the Frontend part of the "Moby Traffic" application
- Optimized the algorithm for rendering text and graphic data in a chat with AI Assistant in the application "Tamashi GDAI"

Stack: Next.js, React, TypeScript, React Flow, Zustand, SWR, Material-UI, FSD, Cursor, Vite, Jest, Cypress, Git, HTML, CSS

React Frontend Developer, Wisebits

- October 2023 – February 2024

Project: Development of a high-load video hosting and streaming portal

Improvements made:
- Developed document upload functionality for video authors
- Implemented a number of tasks for uploading videos and processing user data
- Optimized the work of components from Ui-Kit: UploadVideos, FieldInput, FieldSelect, Modal, StickyNote
- Refactored the code base from legacy (PHP templates) to the React framework

Stack: React, TypeScript, Redux Toolkit, Redux-Saga, React Router, Enzyme, Formik, Storybook, Git, HTML, CSS, CSS-in-JS

React | Vue.js Frontend Developer, Andersen

- December 2021 – September 2023

Project: Development of the "Body Prophet" application for clients and trainers of UK fitness clubs

Improvements made:
- Designed and implemented functionality for coaching staff assessment
- Developed a universal structure for filtering and sorting data in tables
- Developed several new components for UI-Kit: BarChart, Score Review, Dropdown, etc.
- Implemented Unit and E2E tests for the application

Stack: React, TypeScript, Redux, React Router, Formik, Storybook, Git, HTML, CSS

- March 2020 – December 2021

Projects:
- Development of the "Express guarantees" banking service. Integration with "Product and transaction support service" and "Mobile Banking"
- Development of a banking customer service system for reissuing credit cards

Improvements made:
- Implemented Micro Frontend on Webpack Module Federation and developed Webpack configuration for various tasks
- Developed several new components for UI-Kit: Form Components, Modals, etc.
- Developed a system for generating UI widgets based on the JSON model

Stack: React, TypeScript, Redux, Reselect, React Router, Formik, Material-UI, Storybook, Cypress, Jest, Enzyme, Jenkins, Webpack, Git, GitLab, HTML, CSS

- January 2019 – March 2020

Project: Development of an internal CRM system for Sales Managers and Project Managers of the company

Improvements made:
- Developed the “CV Maker” module, which accelerated resume preparation by 80%
- Implemented internationalization system for CRM system

- Developed a mobile version of the application and several new components for UI-Kit: Editable Table, SVG Loader, Chart, etc.

Stack: Vue.js, JavaScript, Vuex, Vuetify, Git, GitHub, HTML, CSS, Sass

Vue.js Frontend Developer, Creanomica

- January 2018 – January 2019

Projects: Development of landing pages, administrative control panels and online stores

Improvements made:
- Developed a structure for administrative control panel for the site content
- Developed a template for creating a Landing Page with payment systems, feedback forms and user metrics

Stack: Vue.js, JavaScript, Vuex, jQuery, Axios, Webpack, Gulp, HTML, CSS, Sass
